

Smart Home & Building Automation — United Arab Emirates

Bijli designs and installs smart home and building automation systems across the UAE — villas, apartments, hotels, and offices — built on careful engineering and honest advice, not gadget-selling.

14+
YEARS IN ENGINEERING &
SMART HOME DESIGN

SERVED

What we do

- **Smart home automation** — smart switches, thermostats, lighting, and voice/AI control.
- **Security & access control** — cameras, video door phones, gate automation, CCTV.
- **Home entertainment & AV** — home cinema, surround sound, video walls.
- **Commercial & hospitality** — hotel access control, building management systems, PA systems.
- **Networking & infrastructure** — structured cabling, Wi-Fi mesh, EV charger installation.
- **AMC & ongoing support** — preventive maintenance with a 48–72 hour response time.

Technology we work with

Bijli works across multiple ecosystems rather than reselling one brand — including Aqara, Sonoff, Samsung, TP-Link, Omada, Linksys, EZVIZ, and Zaytun — selecting and configuring each system around the property.

Why Bijli

- Engineering-grade system design behind every installation
- Experience across villa, townhouse, apartment, and commercial properties
- 12-month workmanship warranty on every installation, independent of manufacturer hardware warranty
- Consultation-led process — no generic packages
